## SEMI-AUTOMATIC THERMOSEALER

### Description:

Heat sealer for pre-cut aluminum lids on plastic pots (by conduction) or glass (by induction), bottles or any other containers, rigid or thermoformed, with suitable pot support

Semi-automatic machine with smooth belt conveyor length 1050mm - width 75 mm.

The operator places the pot on the conveyor.

The lid is taken into place in its magazine, the pot is blocked and the heat sealing is then carried out automatically.

The centering of the lid and its sealing are perfectly reproducible.

The heat-sealed pot then exits onto the conveyor.

Current tools : lid diameter 45 mm

Capacity :

- Packaging or pot with a diameter less than 100 mm
- Maximum height : 240 mm
- Magazine with capacity for 200 to 500 lids

Enclosed machine with safety contact

Manufacturer's documentation including the original instructions

50 sealing cycles per minute max.

Voltage 240V - 10 A

Compressed air required 4 to 7 Bars
