

DATA SHEET

Ref : 2208

Type :
Brand : GRUNDFOS
Model : MTH-4-40/3
Serial N° :
Year : 2020
Quantity : 1
Overall dimensions : 0.20 x 0.25 x 0.45 M
Weight : 10 Kg

Description:

MTH pumps are vertical multistage centrifugal pumps designed for pumping machine tool coolants, condensate transfer and similar applications.

The pumps are designed to be mounted at the top of tanks with the chamber chimney submerged in the pumped liquid.

Applications

- Machine tool applications
- Drilling
- Milling/turning
- Cutting
- Filtration
- Cleaning of parts
- Cooling
- Condensing circuits
- Washing & cleaning

Design Pumps are divided into two parts: The motor and the pump.

This is a standard Grundfos MG motor conforming to EN standards

The pump benefits from optimized hydraulics, different types of fittings, a motor mount, a number of chambers and several other components.

Technical characteristics

- Maximum height (HMT): 100 m
- Max flow: 140 m³/h
