## // Pneumatic volumetric tabletop filling machine for hot pouring

### Description:

Fully pneumatic semi-automatic filling machine for glass or plastic bottles, with volumetric piston dosing, suitable for liquid, viscous, and foaming products.

The machine is equipped with a heating system throughout the entire product circuit.

A heated hose system will need to be provided to replace the current hopper in order to achieve a fully heated circuit.

The filling machine is self-priming.

Equipped with:

- Filling by 1 stainless steel nozzle
- Dosing by 1 volumetric piston
- Pneumatic pressure drive
- Foot pedal control
- Stainless steel frame

Tabletop installation.

Current equipment:

1 piston from 20 to 200 ml

1 stainless steel needle, Ø10 mm

It is possible to replace the pump with the following ranges as an option:

12 ml, 80 ml, 200 ml, 500 ml, and 1000 ml

Maximum production rate:

Approximately 600 to 1,000 bottles per hour, depending on volume and product characteristics

Pneumatic pressure: 5 bar
