### FOR VIALS OR CANS

#### Description:

Semi-automatic dosing machine with volumetric dosing for liquid, sticky, viscous, pasty, and lumpy products.

Equipped with:

- Single-walled stainless steel hopper for product feed.

Capacity: 200 liters

- Two dosing stations with interchangeable volumetric pistons, allowing for different dosages, with rotating stainless steel valves.

- Two nozzles with pneumatic drip-cutting systems.

- Fully pneumatic drive for the dosing machine.

- Adjustable working height.

- Mounted on a stainless steel frame with casters.

Current equipment:

Two dosing pistons, dosing from 500 to 2000 ml

Maximum hourly production: 1000 to 3000 bottles/jars approximately, depending on the product type and volume

Pneumatic pressure requirement: 6 bar
