

DATA SHEET

Ref : 2439

Type :
Brand : TRANSPACK
Model : TP 202
Serial N° : 1306192829
Year : 2013
Quantity : 1
Overall dimensions : 0.90 x 0.60 x 0.80 M
Weight : 60 Kg

Description:

This strapping table only requires an operator to guide the strapping into the clamping and sealing head. This simple and productive strapping machine, with its minimal footprint, is semi-automatic. The absence of an arch allows you to strap any type of package, regardless of size. Furthermore, no modifications or changes to any components are necessary, regardless of the PP strapping width used: simply adjust the guide!

The TP202 uses PP strapping from 6 to 16 mm wide, but operates optimally with 12 mm strapping. How the TP 202 strapping table works: Strapping is simple, fast, and reliable. The strapping machine accommodates all package shapes, even the largest, thanks to the arch that can obstruct your movements.

- Mechanical strapping tension adjustment – 0 to 45 kg
- 280° heat sealing for strapping
- Manual or automated strapping feed programs
- Heat control switch
- Strap widths from 6 to 16 mm (12 mm recommended)
- Easy access to the externally located reel
- Automatic standby mode after 30 seconds.
