

DATA SHEET

FILTER

Ref : 2455

Type : FILTER
Brand : DELTAFILTER
Model : DELTA-STRAIN 240 S/L
Serial N° : 6100
Year : 2011
Quantity : 1
Overall dimensions : 0.80 x 0.70 x 1.50 M
Weight : 50 Kg

// Self-cleaning filter

Description:

Two-part filtration system.

Operates without consumables.

Equipped with a bottom-removable sump and a quick-release DELTA rod closure for one-handed operation.

The filtration system is extremely robust and designed for applications in harsh conditions.

The filter element does not require sealing gaskets.

Impurities are removed from the filter element by scrapers, then directed to the collector and into the filter sump.

Impurities can be discharged manually or automatically via a discharge valve equipped with a timer or a differential pressure control system.

Fluid loss is very low with this equipment.

Filtration fineness: 25 µm – 8000 µm

Flow rate: 24 m³/h

Maximum pressure: 10 bar

Maximum temperature: 80°C

Motor: 400V, 50Hz, 180W

Inlet and outlet connections at the same height, 2" fittings

// Self-cleaning filter
